SUMMARY

Web Developer with hands-on experience in modern web technologies including React, Angular, Node.js, Express.js, MongoDB, and SCSS. Skilled in creating responsive, user-focused applications with a keen interest in blockchain development and AI integration in web apps. Proficient in both frontend and backend development using JavaScript, PHP, and MySQL. Passionate about open-source contribution and building scalable, modern digital experiences.

- **Technical Skills:** React, Node.js, Express.js, MongoDB, Solidity, HTML, SCSS, CSS, JavaScript, MySQL, PHP
- **Familiar with** Angular, Python
- **Languages:** English, Hindi, Gujarati
- **Interests:** Blockchain development, AI integration, Open-source projects
- **Availability:** Open to relocation and remote opportunities

WORK EXPERIENCE

Junior AI/ML Developer, Maxgen Technology pvt ltd

Jul 2025 - Present

Worked as a Junior Developer focused on Artificial Intelligence and Machine Learning. Gained practical experience in the full software development lifecycle (SDLC), from data collection and preprocessing to model training and deployment. Utilized Python and various ML frameworks to build scalable solutions.

WebDeveloper, R&DTeam, GMIU

Dec 2024 - Jan 2026

Developed and deployed responsive web applications using modern frameworks, improving load times by 35%. Optimized backend processes and APIs to reduce server response times by 25%. Supervised a critical engineering project that included the development of a new framework, which was adopted by the team to standardize processes, ultimately enhancing productivity and reducing design iteration cycles by 30%.

Web Developer [Intern], Devxdigi

June 10, 2024 - July 1, 2024

Managed project timelines, reducing delivery times by 30%. Spearheaded the adoption of cutting-edge engineering software, improving project accuracy by 15%. Collaborated with cross-functional teams, enhancing project success rates by 10%.

EDUCATION

Bachelor of Technology in Information Technology

2023 - 2026

Gyanmajari Innovative University-GMIU

Diploma In Computer Engineering

July 2020 - June 2023

Gujarat Technological University (GTU)

PROJECTS

Aerosens - Nextjs, python, ML

Developed a full-stack AI application using Next.js and Python to monitor aircraft engine health. The system analyzes complex sensor data to predict degradation rates and calculate health scores, achieving an 84% model accuracy in forecasting engine conditions. This predictive capability aids in visualizing component lifespans and preventing unscheduled maintenance downtime.

NetGuard - Streamlit, python, ML

Engineered an AI-powered network security tool using Python and Streamlit to detect and classify malicious traffic. The system utilizes machine learning to distinguish between normal activity, known cyberattacks, and unknown (zero-day) threats with 92% accuracy, providing security analysts with a real-time dashboard for proactive threat mitigation.

LifeConnect-React, Node.js, MongoDB, express, solidity

Developed a decentralized system for blood and organ donation using blockchain to ensure data privacy, security, and transparency. Integrated donors, recipients, and healthcare institutions into a unified, trustless network.

IDocx -React-native,python

AI-based solution to automatically identify, classify, and recognize document types and extract key metadata.

OTHER PROJECTS

Blockchain based Doc. storage system- React.js, express.js, Node.js, MongoDB, solidity

Quick Feedback - Angular, ExpressJS, JWT (JSON Web Token), MongoDB, NodeJS

The IGNITE Registration System- HTML, SCSS, JS, MYSQL, PHP

The Gym Wear - HTML, SCSS, JS, MYSQL, PHP
